

flex7 Projects Service

Whether you're using our system for the first time, or just need your next big lighting installation to run smoothly, our projects service offers a helping hand from start to finish:

- Technical/design advice
- Precise list of materials required
- Detailed room schedules
- Items packed room by room
- Marked up drawings
- On site training
- No hidden extras

Why Use Our Project Service?

We have a dedicated division to assist with your larger lighting projects. Our friendly team is happy to answer any questions you might have and lead you through the process from initial enquiry right through to delivery to site.

Simplifying Your Project

Once we've reviewed your drawings and listened to your requirements we provide you with a simple quotation detailing the most appropriate flex7 products for the job and the exact number you'll need of each.

Detailed Information

Along with the quote we'll also provide a detailed breakdown of how many products we've scheduled in each individual room included in the design.

Time To Despatch

When the design is finalised, marked up drawings will be produced to assist with your installation.

And finally, to ensure the installation process is as simple as possible, we'll pack the products required for each room in their own individual and clearly labelled carton so you and your team can be certain that the products are installed exactly where intended - if it's in the 'Kitchen' carton, it's for the Kitchen.

No Hidden Extras

We tell you exactly what we've included in our design (and what we haven't) so there's no nasty surprises down the line. If you ask us to prepare a quote we think it should be one you can trust.

How it works: A step-by-step guide

1. Initial consultation

Contact your local flex7 Sales & Specification Engineer to arrange a first meeting and talk through your project requirements.

2. Share your project information

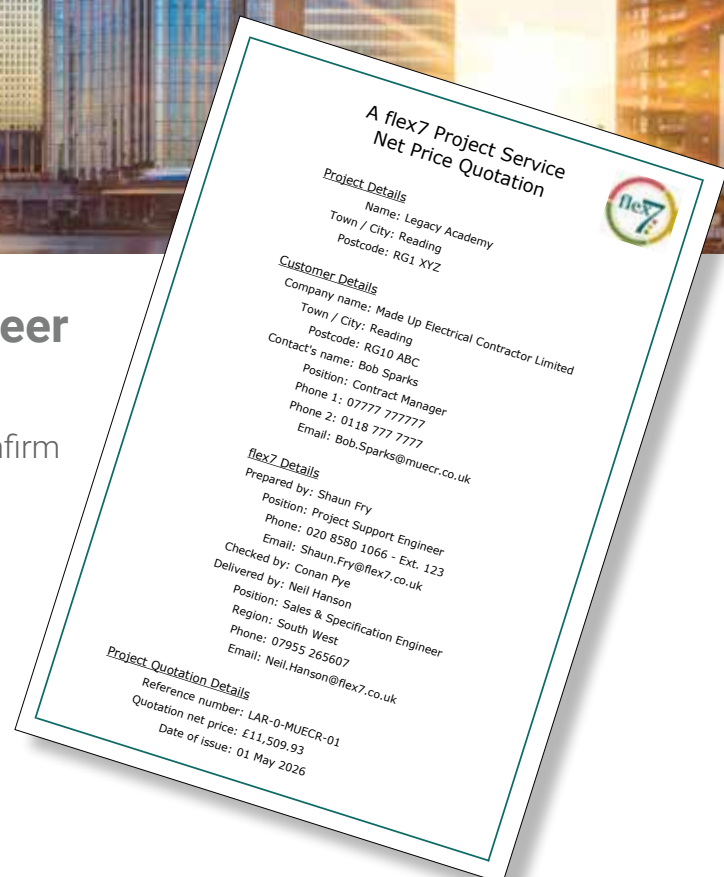

Send us your PDF lighting drawings, luminaire schedule, specifications, and any other helpful details.

3. Meet your Project Support Engineer

Before work begins, your assigned Project Support Engineer will get in touch to introduce themselves, confirm estimated timescales, and clarify any aspects of the design they may have queries around.

4. Design proposal & review

Once the design is complete, your flex7 Sales & Specification Engineer will return to present our proposal and ensure everything aligns with your requirements.

			Total:	£ 11,988.93

5. Order confirmed, preparation begins

After we receive your purchase order, we'll produce drawing mark-ups showing the approximate positions of the flex7 equipment scheduled.

At the same time, we'll pack products into room-specific cartons, each containing the relevant room schedule and any additional information to support installation.

Example Area/Room Schedule

Legacy Academy, Reading

Drawing ref.	Level	Space	Count	Part No.	Short Description
23062(63)001_f7	Level 00	Entrance Lobby	1	FSU08	f7 - Starter Dist. Box, 8-way
			1	FL3100LSHF3/RE	f7 - Non-maintained Em. Lum. Lead, 3-core, 1mm, 3m, Red
			1	FL4100LSHF3/R	f7 - Maintained Em. Lum. Lead, 4-core, 1mm, 3m, Red
			4	FL5100LSHF3/BD	f7 - DALI Dimming Lum. Lead, 5-core, 1mm, 3m, Black
			1	FNC4000X	f7 - DALI Network Control Mod.
			1	FNH400	f7 - PIR + Daylight, White
			1	FSL05	f7 - Link Lead, 5m, Grey

Drawing ref.	Level	Space	Comments
23062(63)001_f7	Level 00	Entrance Lobby	Presence control with daylight linking - luminaires will regulate in relation to ambient light Set target light level with FRC/SET (remote hand set)

6. Delivered to site, ready to install

Project name —————> Legacy Academy, Reading
Drawing reference/revision —————> 23062(63)001_f7
Floor —————> Level 00
Area —————> Entrance Lobby
Carton no. —————> Carton 1

Your products are dispatched directly to site, ready for installation by your team.

If required, your flex7 Sales & Specification Engineer can visit site beforehand to walk through the installation process with your team before any cartons are opened.

Legacy Academy, Reading
