3-7 Pole Plug-in Ceiling Rose

Prota is the world's first 7-pole 'decorative' plug-in ceiling rose. Incorporating the trusted flex7 plug and socket interface, Prota is ideal for surface installations where final connection to the luminaire has to be aesthetically pleasing.

The socket fits onto any standard BESA box. Suitable for standard, dimmable, or specialist lighting applications. The plug latches into place with a satisfying 'click' and the decorative cover, secured with a simple quarter twist, provides the finishing touch.

Available in black, white, and red options.

Available in 3-7 pole options (incl. earth).

Suitable for all lighting applications;
(simple on/off, dimmable or specialised.)

Large capacity terminals;
(easily accept 5 x 1.50mm² conductors.)

Suitable for on-load connection/disconnection of luminaires.

Easy to remove cover.

100% tested at point of manufacture.

Designed and manufactured in the UK.

Easily accessible side-facing terminals:

Side-facing terminals provide easy access for test equipment probes. Simply remove the socket cover to access. There is no need to pull the socket away from the BESA box, so no need to disturb the fixed wiring.

Socket sits completely flush to BESA box:

There is no back projection of the socket into the BESA box, which means wiring space is maximised. This reduces the risk of trapping/stressing conductors as the socket is secured.

For your convenience we supply popular Prota parts in kit form. Kits comprise a socket, a luminaire lead and a decorative cover.

We offer an extensive range of luminaire leads which minimise installation time. All variants are available in Low Smoke Halogen Free (LSHF) cable, in accordance with BS EN 50525-3-11 and CPR rated to category Cca, so you can be assured they'll meet required safety standards for public and commercial buildings.

White cable is available in all variants, and black cable is available in 1.00mm² LSHF.

Cover & Sockets

If preferred, you can purchase decorative covers, sockets, and luminaire leads individually.

Prota plugs are not available unwired, but we do offer an extensive range of luminaire leads.

Decorative Cover

The Decorative Cover fits neatly over the plug and socket with a simple quarter-twist action. This ensures the cover remains securely in place, but is easy to remove when required.

Description	Part no.	Price
Decorative Cover in white (Box of 10)	PDC/W	£1.21 ea.
Decorative Cover in red (Box of 10)	PDC/R	£1.36 ea.
Decorative Cover in black (Box of 10)	PDC/B	£1.59 ea.

Sockets

Prota sockets are supplied with captivated M4 fixing screws. They mount directly to any standard BESA box. The socket sits completely flush against the conduit box, with no back projection into it. This maximises wiring space.

Side accessible terminals make testing and fault finding post installation easy and trouble-free. Terminals easily accept 5 x 1.50mm² conductors.

DALI and DALI Maintained Emergency Luminaire Leads

Use with luminaires that are controlled solely by a DALI signal (or similar protocol) and as such do not require mains rated switched live.

Luminaire leads ending “D” derive their permanent supply separately to the emergency supply (non-emergency luminaires remain operational during an emergency test).
Luminaire leads ending “X” derive their permanent supply from the emergency supply (non-emergency luminaires turn off during an emergency test).

Note: IET Wiring Regulations 18th Edition BS 7671

559.5.6 - Protection against heat and UV radiation effects within luminaires.

External cables and cores of cables connected within a luminaire or passing through shall be so selected and erected that they will not suffer damage or deterioration due to heat and UV radiation generated by the luminaire or its lamps (e.g. shielding of the cable from heat and/or UV by means of heat/UV-resistant sleeving).

Modular Lighting Connection

flex7 is a modular lighting connection and control system. It simply plugs together on site, saving up to 60% installation time.

Sensor Head Options

- Unobtrusive & Discrete
- Fits a 32mm aperture
- Protected Extra Low Voltage
- RJ11 Connectivity
- Installed in seconds
- No on-site termination

Plug-in Switches

- Use with any Euromod fascia
- Part M Building Regs.
- Protected Extra Low Voltage
- RJ11 Connectivity
- Installed in seconds
- No on-site termination

Modular System

- Extend supply & control circuits.
- Extend supply circuit only
- Easily add extra outlets
- Easily add extra controls
- No on-site termination

Plug-in Control Packs

- Auto-dimming (daylight linking)
- Manual switching/dimming
- Emergency luminaire test
- RJ11 Connectivity
- Installed in seconds
- No on-site termination

Extender Leads

- Luminaire to luminaire (long rows)
- Isolation point close to luminaire
- Isolate/remove individual luminaire whilst others remain operational
- Fewer joints than conventional 'T' System
- No on-site termination

7-Pole Lighting System

- Standard (on/off) or dimmable luminaires
- Maintained emergency luminaires
- Non-maintained emergency luminaires
- Special luminaires.
- Also
- Extract fans (with or without run on)
- HVAC equipment & AHU Supplies
